

**Ramset®**  
DRIVING JOBSITE SPEED

**FASTENING SYSTEMS**

The new Ramset® **VIPER4** .27 Caliber Strip Powder Tool design makes overhead applications even easier. The load advance is now located internally to allow a push/sleeve actuated operation. *Compatible with the newly designed poles*, the rear collar is connected by set-screw to avoid a manual tightness check.

**Automatic load advance:**

Load is advanced consistently each time the Viper is fired.

**Automatic Piston return:**

No time spent manually resetting or cycling the tool. Allows you to work faster.

**Overdrive Protection:**

Heavy duty buffer system prevents front end damage caused by piston overdrive—especially through sprayed-on insulation.

**Open Front-end design:**

Completely redesigned open-ended muzzle keeps your tool cleaner longer.

**Simplified Barrel Retention Collar:**

No tools are required for assembly or disassembly.

**Uses NEW Viper pole system:**

Works with four newly designed Ramset® poles for greater ease and accuracy.

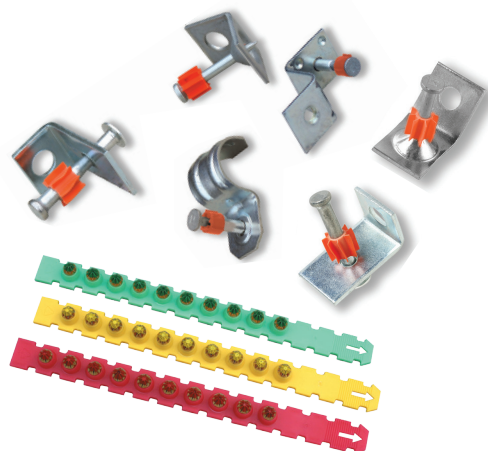

PART NUMBER	DESCRIPTION
V4-3	3' Pole
V4-6	6' Pole
V4-8	8' Pole
V4-EXT	3' Extension (no trigger)

*\*Telescoping poles are NOT available for the VIPER4.*

**TOOL/POLE CONNECTION**

The new poles have an internal rod, when activated by pushing on the pole sleeve triggers the new Viper.
